5.04.100 Categorical exemptions—Determination.

A. When the district receives an application for a license or, in the case of governmental proposals, an agency initiates a proposal, the responsible official shall determine whether the license and/or the proposal is exempt. The determination that a proposal is exempt shall be final and not subject to administrative review. If a proposal is exempt, none of the procedural requirements of this resolution shall apply to the proposal.

B. In determining whether or not a proposal is exempt, the responsible official shall make certain the proposal is properly defined and shall identify the governmental license required. If a proposal includes exempt and nonexempt actions, the responsible official shall determine the lead agency even if the license application that triggers the consideration is exempt.

C. If a proposal includes both exempt and nonexempt actions, the district may authorize
exempt actions prior to compliance with the procedural requirements of this resolution, except that:

1. The district shall not give authorization for:
   a. Any nonexempt action;
   b. Any action that would have an adverse environmental impact; or
   c. Any action that would limit the choice of reasonable alternatives.

2. The district may withhold approval of any permit, application or proposal, the basis of which is an exempt action that would lead to modification of the physical environment, when such modification would serve no purpose if the nonexempt actions were not approved, and

3. The district may withhold approval of any permit, application, or proposal, the basis of which is an exempt action that would lead to substantial financial expenditures by a private applicant when the expenditures would serve no purpose if the nonexempt actions were not approved. (Res. 97-007 Exh. A § 10)

5.04.110 Determination—Review at conceptual stage.
A. If the district’s only action of a proposal is a decision on a building permit or other license that requires detailed project plans and specifications, the applicant may request in writing that the district conduct environmental review prior to submission of the detailed plans and specifications.

B. In addition to the environmental documents, an applicant shall submit the following information for early environmental review:
   1. A copy of any permit or license application.
   2. Other information as the responsible official may determine. (Res. 97-007 Exh. A § 11)

5.04.120 Threshold determinations—Environmental checklist.
A. A completed environmental checklist shall be filed at the same time as an application for a permit, license, certificate or other approval not exempted by this resolution. B. A checklist is not needed if the district and the applicant agree an EIS is required, SEPA compliance has been completed, or SEPA compliance has been initiated by another agency.

C. For private proposals, the applicant is required to complete the environmental checklist. The district may provide assistance as necessary. For district proposals, the department initiating the proposal shall complete the environmental checklist for that proposal.

D. The district may decide to complete all or part of the environmental checklist for a private proposal, if any of the following occurs:
   1. The district has technical information on a question or questions that is unavailable to the private applicant; or
   2. The applicant has provided inadequate or inaccurate information on previous proposals or on proposals currently under consideration.

E. The applicant shall pay to the district the actual costs of providing information under subsection (D) (2) of this section. (Editorially amended during 2002 codification; Res. 97-007 Exh. A § 12)

5.04.130 Threshold determinations—Mitigated DNS.
A. The responsible official may issue a determination of nonsignificance (DNS) based on conditions attached to the proposal by the responsible official or on changes to, or
clarifications of the proposal made by the applicant.

B. An applicant may request in writing early notice of whether a determination of significance (DS) is likely. The request must:
   1. Follow submission of a permit application and environmental checklist for a nonexempt proposal for which the department is lead agency; and
   2. Precede the district’s actual threshold determination for the proposal.

C. The responsible official’s response to the request for early notice shall:
   1. State whether the district currently considers issuance of a DS likely and, if so, indicate the general or specific areas of concern that are leading the district to consider a DS; and
   2. State that the applicant may change or clarify the proposal to mitigate the indicated impacts, and may revise the environmental checklist and/or permit application as necessary to reflect the charges or clarifications.

D. When an applicant submits a changed or clarified proposal along with a revised environmental checklist, the district shall base its threshold determination on the changes or clarified proposal.
   1. If the district indicated specific mitigation measures in its response to the request for early notice, and the applicant changed or clarified the proposal to include issue and circulate a DNS if the district determines that no additional information or mitigation measures are required.
   2. If the district indicated areas of concern, but did not indicate specific mitigation measures that would allow it to issue a DNS, the district shall make the threshold determination, issuing a DNS or DS as appropriate.
   3. The applicant’s proposed mitigation measures, clarifications, changes or conditions must be in writing and must be specific.
   4. Mitigation measures which justify issuance of a mitigated DNS may be incorporated in the DNS by reference to agency staff reports, studies or other documents.

E. The district shall not act upon a proposal for which a mitigated DNS has been issued for fifteen (15) days after the date of issuance.

F. Mitigation measures incorporated in the mitigated DNS shall be deemed conditions of approval of the licensing decision and may be enforced in the same manner as any term or condition of the permit or enforced in any manner specifically prescribed by the district. Failure to comply with the designated mitigation measures shall be grounds for suspension and/or revocation of any license issued.

G. If the District’s tentative decision on a permit or approval does not include mitigation measures that were incorporated in a mitigated DNS for the proposal, the District should evaluate the threshold determination to assure consistency with WAC 197-11-340 (3) (a), as now existing or hereafter amended, relating to the withdrawal of a DNS.

H. The district’s written response under subsection B of this section shall not be construed as a determination of significance. In addition, preliminary discussion of clarification or changes to a proposal, as opposed to a written request for early notice, shall not bind the district to consider the clarifications or changes in its threshold determination. (Editorially amended during 2002 codification; Res. 97-007 Exh. A § 13)
